

Amendments to the Written Description

Page 6, lines 3-11:

While an exemplary embodiment of invention has been described and illustrated, it is to be understood that the above description is intended to be illustrative and not restrictive. Many variations to the above-described system and method will be readily apparent to those having ordinary skill in the art. For example, a single-sided or double-sided piece of adhesive tape may be used as the diversion material. Further, instead ~~a of~~ using adhesive tape for the diversion dam a thin layer of other material can be deposited between the die and circuit board, where the thin layer of material has sufficient heating characteristics to maintain its form during encapsulation.
